

ABOUT ME

I am a novice professional with meaningful experience and sturdy education on engineering principles, biological procedures and agricultural practices. I aspire to become a professional food engineer; optimizing fresh food production, water usage, farming and sustainable agriculture.

HONORS AND AWARDS

- UM Graduate Entrance Scholarship (2021)
- University of Florida Honors Program Cohort (2020)
- ASABE Outstanding Scholar (2020)
- Davis Foundation Scholarship Recipient (2016)
- UWC Maastricht Scholarship Recipient (2014)

CERTIFICATIONS

- MATLAB Fundamentals
- Python Data Structure
- Fundamentals of Project Planning and Management
- GMPs & GLPs
- Agribusiness Innovation
- Agrotechnology Fundamentals

INTEREST

DOUGLAS SANTOS

Biosystems Engineer

 \mathbf{Y} santoscd@myumanitoba.ca

(204) 500-8178

EDUCATION

Master of Science in Biosystems EngineeringDec. 2022University of Manitoba, CanadaDec. 2022

Bachelor of Science in Biological Engineering2016-2020University of Florida, USA2016-2020

PROFESIONAL EXPERIENCE

UM Grain Storage Research Lab

2021-Present

in

Graduate research assistant

 Studies the characterization of pore structure of granular material under storage ecosystem conditions affected by different physical factors, including moisture content, interparticle interaction, particle size, and dockage distribution using non-destructive x-ray and image analysis.

Puerto Rico Department of Education

2020

Information Technology Instructor

- Organized didactic material based on the discernment of curriculum, delivering lessons to seventy-five high school students via e-learning.
- Conducted IT-skill-gap analysis giving maintenance to hardware equipment and providing staff role-specific training on educational software.

LEADERSHIP POSITIONS

UM Faculty of Agricultural and Food Sciences 2022 *Faculty Ambassador*

• Performs an integral role in developing and executing projects for the growth of the faculty's undergraduate programs, as well as the fostering of important relationships that the institution has with industry, stakeholders, and alumni.

UM Earth Student Organization

2021

 Project Lead
Conducted bi-weekly meetings with volunteer students engineering future implementations for the progress of an automated growth chamber made from a converted ship container built as a proof of concept for food production in remote and frigid conditions.
